**Instruction:** You are offered the test items on the base of context with one correct answer from five proposed ones. Read the context attentively and do the items.

### **Space Tourism**

Astronauts are not the only people travelling to space anymore. Everyone can buy a ticket and spend their holiday in space, as long as they have the money! Make your reservations now. The space tourism industry is officially open for business, and tickets cost at least \$20 million for a one-week stay in space. Despite reluctance from NASA, Russia made American businessman Dennis Tito the world's first space tourist. Tito flew into space aboard a Russian Soyuz rocket that arrived at the International Space Station (ISS) on April 30, 2001. South African businessman Mark Shuttle was the second space tourist. He took off aboard the Russian Soyuz on April 25, 2002, also bound for the ISS. Greg Olsen, an American businessman, became tourist number three to the ISS on October 1, 2005. On September 18, 2006 Anousheh Ansari, a telecommunications entrepreneur, became the first female space tourist and the fourth space tourist overall. Space tourism will be one of the most lucrative industries in the 21st century. There are already several space tourism companies planning to build suborbital vehicles and orbital cities within the next two decades. These companies have invested millions believing that the space tourism industry is on the verge of taking off.
